

HansaBioMed Life Sciences (HBM)

Kits for exosome extraction and purification

HBM offers the widest choice and selection of products dedicated to exosome research for life science applications available on the global market. The portfolio includes lyophilized exosomes from numerous cell lines, exosome binding antibodies and kits for enrichment of specific exosome subpopulations. Moreover, HansaBioMed Life Sciences collaborates with leading international research groups, both academic and industrial, to develop further its technology platform.

Since May 2017, HansaBioMed Life Sciences is part of Lonza, a global leader in the field of biopharmaceutical development and manufacturing. As a new part of Lonza, HBM-LS will continue its product portfolio expansion of research products and support the development of cGMP-compliant exosome manufacturing processes.
